

AEA in-kind and financial support of events

Version 1, 21 March 2019

The AEA aims to promote excellence and innovation in the practice of epidemiological methods and good use of data. We would like to maximise the opportunity for members to attend or listen to relevant presentations and workshops including those by visiting experts. AEA Council encourages members to share information about upcoming seminars and workshops that might interest AEA members, and to make them available to members who cannot attend.

If you have a seminar or workshop being run at your institution that may interest AEA members, please share this information. Please also consider co-badging your event with AEA and / or asking speakers to run a separate AEA Chapter event in your area.

We offer the following tiered support of events that align with the AEA aims and strategic plan. All events must be approved by Council and follow the AEA Equity and Diversity Policy and Code of Conduct (see AEA website for more details). Please email bulletin@aea.asn.au to request support.
